| Project Title | Don't let this one slip away! Top talent gets picked first! Help speed up the Hiring Process! |
| Project Summary | Create a Human Resources System with both wizard support and workflow management. |
| Country | United States |
| Country/Region of Focus | United States |

## Project Description

Make a difference in bringing the best talent into the US Department of Health and Human Services and add this impressive project to your resume. We are looking for tech savvy students who can create a Human Resources System with both wizard support and workflow management. We would like a system that takes an HR liaison through 1) a wizard when creating the paperwork needed to post a job and 2) a wizard to complete paperwork to hire selected candidate. Requirements also include: The ability to import documents into the system; The ability to flow documents through approval chain by email and; The ability to track status and who has and will take action at any given point in the process.

The faster we can work though the hiring process the better change we have of retaining the talent of the best and the brightest staff.

## Required Skills or Interests

| Skill(s) |
|---|
| Data analysis |
| Data visualization |
| Design thinking |
| Editing and proofreading |

## Additional Information
